Cooper Union ECE student with production startup experience, ML research, and national-level competitive programming recognition. Takes projects from early experiment to deployed, polished product across backend, infrastructure, and UI/UX.

Education

Cooper Union for the Advancement of Science and Art Bachelor of Engineering, Electrical Engineering	New York, NY Jun. 2030
Hunter College (Dual Enrollment) Multivariable Calculus, Linear Algebra, Intro to Data Science, Bayesian Stat	New York, NY Aug. 2025 - Jun. 2026
Hunter College High School High School Diploma	New York, NY Jun. 2026

Experience

Research Assistant | Distributed Artificial Intelligence Research (DAIR) Lab

Hunter College, Winter 2024 - Present

- Researched multi-agent reasoning and collaboration between LLMs for abstract reasoning problems (ARC-AGI). Achieving significant improvements across the benchmark using collaboration architecture and prompts.
- Operated GPU clusters to train and finetune novel model architectures in classification and language models in collaborative machine learning research environments.
- Analyzed data, designed experiments, wrote, and submitted a research paper with a Masters student to multiple AI conferences.

Software Engineering Intern | Atom Map Corporation

New York, NY, Nov 2024 - Apr 2025

- Gained industry-level software development experience, including maintaining code quality, version control, and deployment best practices.
- Developed and deployed two custom Slack bot applications, actively used across the company's workspace to improve productivity by integrating with Zotero and Jira workflows.
- Built custom command-line tools in Python to automate routine tasks using AI, resulting in a 70% reduction in manual effort while creating pull requests

Software Engineering Intern | Teachshare

Harvard Undergraduate Ventures Tech Summer Program, Jun 2025 - Aug 2025

- Improved the backend infrastructure and AI workflow implementation for intelligent worksheet generation.
- Designed and integrated new features into the AI worksheet creation system, increasing customization options and content accuracy for educators.
- Participated in product design, fundraising, and market validation workshops within a startup accelerator environment.

Private Tutor for Chess and Computer Science

In-person and online, 2021 - Sep 2025

- Taught 30+ students in a group computer science course I designed. Incorporated algorithms, coding challenges, and project-based learning to build practical skills.
- Privately tutored 9 students in chess and ran the chess club at my local library, with 40+ members. Focused on strategy development, gameplay analysis, and tournament preparation.
- Privately tutored 5 students in computer science, covering topics from foundational programming concepts to advanced competitive programming/algorithms techniques.

President | Vision Gavel Club (Toastmasters certified)

New York, New York, Feb 2025 - present

- Lead a 12+ member, Toastmasters-certified public speaking club, leading workshops and mentoring members.
 - Organized and facilitated sessions in Chinatown, building communication and leadership skills for diverse participants.
-

Projects

Speechly | Communication SaaS

<https://speechly.david3u.com>

- Built an AI-powered application that analyzes recorded audio to count filler words and give deep, specific feedback on issues.
- Iteratively shipping new features to utilize AI's full multimodal capabilities for communication coaching.

NYConductor | NYC public transport navigation assistant

<https://nyconductor.david3u.com>

- Built an AI agent connected to multiple NYC transit API endpoints to answer natural language transit questions in any language.
 - Engineered the agent to handle non-traditional queries such as finding intersecting subway stops and planning multi-stop routes.
 - Designed with accessibility in mind, enabling non-English speakers to navigate New York City's transit system.
-

Skills

Languages

- Python, C++, HTML, CSS, JavaScript, TypeScript, Java, SQL, R

Other skills

- AWS, AI workflows, MCP, OpenAI, PyTorch, Git, Pandas, Docker

Awards

- USACO Gold and non-certified platinum
- NYC DMI (Downtown Math invitational) team first place
