

DAVID WU

3udavid@gmail.com | david3u.com | 929-287-7948

Electrical Engineering student at Cooper Union with hands-on experience in ML research, software engineering, and education technology. Contributed to multi-LLM reasoning research at an AI lab, shipped production tools at two software internships, and built AI-powered applications with real users. Passionate about building at the intersection of AI and education.

Education

Cooper Union for the Advancement of Science and Art
Bachelor of Engineering, Electrical Engineering

New York, NY
May. 2030

Hunter College (Dual Enrollment)

Multivariable Calculus, Linear Algebra, Intro to Data Science, Bayesian Stat

New York, NY
May. 2030

Hunter College High School

High School Diploma

New York, NY
Jun. 2026

Experience

Research Assistant | Distributed Artificial Intelligence Research (DAIR) Lab

Mar 2025 - Feb 2026

- Researched multi-LLM reasoning and collaboration, gaining +15% score over TRM on abstract reasoning (ARC-AGI).
- Operated 8xH-100 GPU clusters to train novel NLP and LLM models over 100 hours in a collaborative research environment.
- Analyzed data, designed experiments, wrote, and submitted a research paper with a mentor to AI conferences.

Software Engineering Intern | Fathom TX

Nov 2024 - Apr 2025

- Learned and applied industry-level software practices: maintaining code quality, version control, and deployment.
- Developed 2 Slack applications integrated with Zotero and Jira workflows actively used by 5+ to improve productivity.
- Built custom tools in Python to automate routine PR tasks using AI, resulting in a 70% reduction in manual effort.

Software Engineering Intern | Teachshare & Harvard Undergraduate Ventures Tech

Jun 2025 - Aug 2025

- Improved backend worksheet file processing efficiency by 10% and cleaned up AI workflows for worksheet generation.
- Designed new features for AI worksheet creation, improving generated diagram customization options and accuracy.
- Certified after 25 product design, fundraising, and market validation workshops in a Harvard-backed startup bootcamp.

Chess and Computer Science Private Tutor | In-person and remote

Feb 2022 - Sep 2025

- Taught 30+ students in group CS courses I designed. Including algorithms, coding challenges, and project-based learning.
- Privately tutored 9 students in chess and ran the chess club (40+ members) at the library. Focused on strategy development, gameplay analysis, and tournament preparation.
- Privately tutored 5 students in CS, from foundational programming concepts to advanced DSAs.

Projects

Speechly | Communication training app

<https://speechly.david3u.com>

- Analyzes recorded audio for issues such as filler words, stutters, mumbling, and gives deep, specific feedback on issues like pacing, volume, and content.
- Iteratively testing and improving features from user feedback with new AI workflows and model capabilities.

NYConductor | NYC public transport navigation assistant

<https://nyconductor.david3u.com>

- An AI agent connected to multiple NYC transit API endpoints to answer natural language transit questions in any language.
- Handles non-trivial queries, such as finding intersecting subway stops and planning multi-stop routes, with intelligence.
- Accessibility compliant Enabling disabled and non-English speakers to navigate New York City's transit system confidently.

Skills

Languages: Python, C++, HTML, CSS, JavaScript, TypeScript, Java, SQL, R

Technologies: AWS, AI workflows, MCP, OpenAI, PyTorch, Git, Pandas, Docker

Awards: USACO Gold and non-certified platinum, NYC DMI (Downtown Math invitational) team first place

Interests

- Competitive fencing (épée)
- Cooking
- Strategic boardgames (especially Catan!)
